

# Disable NetBox Community Plugins

## Introduction

Each community plugin can be disabled, however, note that all this script will do is remove the plugin name from the `PLUGINS = ['plugin_name']` string in the `configuration.py` file. It will not uninstall the plugin or drop any database tables.

To re-enable the plugin, follow the [Deploy NetBox Community Plugins](#) guide.

The screenshot shows a terminal window in Semaphore UI. The task is titled "C. NetBox Secrets - Disable Plugin" and is marked as "Success". The terminal output shows the following steps:

```
11:27:43 AM PLAY [127.0.0.1] *****
11:27:43 AM TASK [Gathering Facts] *****
11:27:43 AM ok: [127.0.0.1]
11:27:43 AM TASK [Set plugin to netbox_secrets] *****
11:27:43 AM ok: [127.0.0.1]
11:27:43 AM TASK [netbox-plugin-disable : Get current enabled NetBox plugins from the NetBox configuration.py file] *****
11:27:44 AM changed: [127.0.0.1]
11:27:44 AM TASK [netbox-plugin-disable : Prepare a list of existing plugins in configuration.py] ***
